# Gasboy Prime EMV

CHS has been working with Gasboy to test safe and secure credit card transactions with their new EMV solution, Gasboy Prime.

With Gasboy Prime, a Managed Network Service Provider (MNSP) program will be introduced. This MNSP program will help you with your PCI requirements. With the MNSP, Abierto devices are no longer supported and must be replaced with the PaySafe UTM firewall from PDI. A PaySafe needs to be added at each Gasboy location and FHO if the FHO is not on site with a Gasboy. When you are ready to upgrade your current Gasboy solution to Gasboy Prime, please follow the steps listed below:

STEP 1 — Change in Equipment form
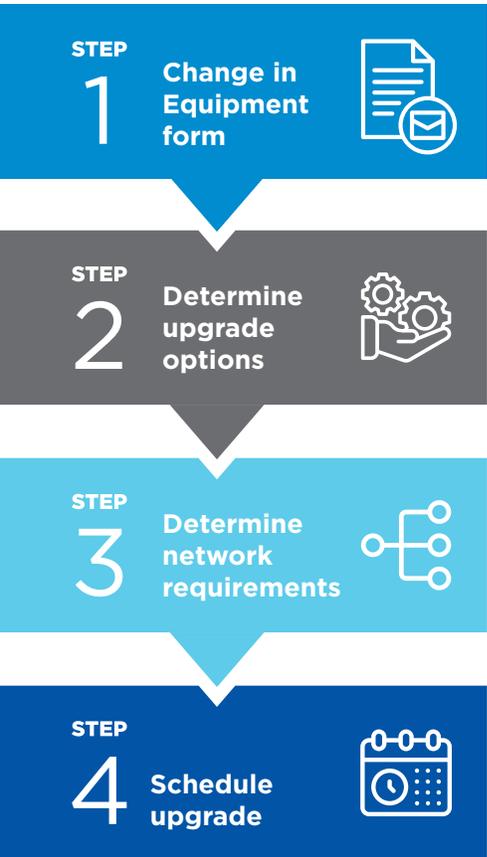

Complete the attached *Change in Equipment* form and return it to the Payment Solutions team. With this form, we will ensure you have a POS Protect + agreement, and place an order for the PaySafe UTM if you don't already have one installed.

STEP 2 — Determine upgrade options

There are a wide variety of Gasboy hardware configurations that could be implemented at your location. To determine the correct hardware upgrade options to support EMV transactions, please email **Jim.Smith@gilbarco.com** to discuss hardware options.

STEP 3 — Determine network requirements

If you have specific networking requirements, VPN needs, or multiple Gasboy locations connected to one FHO, your IT representative and a Solutions Architect at PDI will need to schedule a configuration discussion. To initiate this discussion, email **John.Sparks@pdisoftware.com** and **Sam.Lau@pdisoftware.com** with the subject *Gasboy PaySafe Discussion Request*. From there, a call will be scheduled in 3-5 business days to discuss custom configurations.

STEP 4 — Schedule upgrade

Once you have submitted your *Change in Equipment* form to the Payment Solutions team, ordered the correct hardware from your Gasboy distributor, and discussed your networking requirements with PDI, you can schedule your upgrade. Please contact your Authorized Service Contractor for more information.

If you have questions, contact your ASC or Gasboy at 972-837-6903.
