Background:

The Gasboy Fleet Head Office software has served as a centralized solution for managing fleet fueling operations. Over the years, it has supported a wide range of customers in streamlining their fuel management processes. However, as technology and customer needs have evolved, so has our product strategy. Most of our new customers have already transitioned to EKOS, our next-generation cloud-based fleet management platform. EKOS offers a more modern, scalable, and secure solution that better meets the demands of today's fleet operations.

Why EKOS?

Gasboy EKOS provides several key advantages over Fleet Head Office, including:

Hosted Solution Advantages:

- Eliminate IT costs associated with hardware and system management
- Automatic data archiving and redundancy
- Seamless software upgrades; always on the newest version
- Unlimited users and reduced user management since the system is web-enabled
- Implementation of the entire software system can be done remotely by the Gasboy team
- Online help with advanced tooltips and screencast tutorials for users

Enterprise Platform Advantages:

- Browser-neutral and works on desktops and mobile devices
- Web-based and accessible from any smart device
- Unlimited users, role-based access, with user-controlled preferences on views

Effective August 1, 2025:

- The Gasboy Fleet Head Office software will no longer be available for new customers.
- Single-site and multi-site licenses will no longer be available.
- V7 upgrades will no longer be available.
- 5-site upgrades will continue to be available for existing customers.

Effective December 31, 2025:

- The Gasboy Fleet Head Office software will no longer be available for existing customers.
- Site upgrades will no longer be available for existing customers.

Product Support:

Technical support, software updates, and security patches will continue to be available through December 31, 2028.

Fuel Point PLUS:

Please note that this notification does not affect the FuelPoint PLUS vehicle identification product. Wireless gateways, nozzle readers, vehicle rings, and cubes will continue to be available for all customers.

Next Steps:

For questions, migration assistance, or to explore available options, please contact your Gasboy Commercial Account Manager. See map below...
